

## NB-350G

### FEATURES AND ADVANTAGES

- Using IGBT inverter technology, high efficiency and save power and cost.
- Can working  $\pm 15\%$  voltage fluctuation.
- Precise voltage and current setting, excellent welding performance.
- Dynamic characteristic to make arc stable and low sparkle during welding.
- High duty cycle, it can continually welding.
- With 2T/4T function, make welder easy & relax welding.
- Ball cutting function after welding to meet different high performance welding procedures.
- Handles a wide range of wire.

Model	NB-350G
Input Power(V)	380
Power supply (V/HZ)	3ph-380V 50/60HZ
Input Current (A)	44
Output Current (A)	40-350
OCV (V)	60
Rated Output (% at A)	30% at 350A at 40 degree; 60% at 20 degree
Electrode /wire dia (mm)	0.8-1.6
Packing Tyoe and dimension (LXWXH) mm	690*430*710
Weight (Kg)	45
Loading Qty (pcs/40ft)	240
